

Fibre Optic Heat Curing Termination and Inspection Kits

Description

The Optronics heat cure fibre termination and inspection kit is a much needed and valuable kit for anyone wishing to terminate fibre using the heat cure method. This kit is suited for anyone who is competent at terminating fibre. The kit contains the Optronics range of tools (contents listed below) and an inspection scope also comes as standard. All items are packed into their own cut-foam compartment to keep them safe from damage, and all are presented in a robust, virtually indestructible, yet stylish case, ideal for such fragile equipment. Optronics has recently updated and modernised its range of tool kits and they are a must-have for any installer in the fibre optic industry.

Our kits now come loaded with the high quality and very popular range of OptronicsTools, giving the user comfort in the knowledge that they are using a superior tool with a consistent quality in performance which is critical in our industry today. The excellence of the OptronicsTools are also represented in the tool case which is IP67 rated and are normally used in military applications, therefore, assuring they have passed rigorous testing. Our cases offer the following features and benefits:

- ▶ Airtight
- ▶ Interstackable
- ▶ High thickness body material
- ▶ Can withstand temperatures between -33 & +90 °C
- ▶ Crush & Shock proof
- ▶ Sand and dust proof
- ▶ Watertight and waterproof

The inserts are made from a dense foam which will not absorb any spilt liquid making the case ideal for protecting any fragile equipment contained in the kit. Routed using a computerised method, the tools fit perfectly in their designated areas with the two-tone effect allowing for easy identification of any missing tools.

In addition to the standard kit, we also offer a customisation programme for those who wish to put their own mark on the product and decide exactly how the contents should be made up (MOQ, price variations and lead times will apply).

Heat Curing Kit Contents

Kit Contents

ITEM	QUANTITY
Inspection Scope (x200 mag)	1
Fibre Optic Stripper (Tri Hole)	1
Kevlar Scissors	1
Fibre Optic Crimp Tool	1
Cable Ringing Tool	1
Connector Cleaning Fluid (3oz)	1
Universal Stripping Tool	1

ITEM	QUANTITY
Carbide Pen Scribe	1
Fluid Dispenser	1
Sin Bin	1
